WORKERS' COMPENSATION BOARD OF B.C.

About WorkSafeBC

WorkSafeBC (the Workers' Compensation Board) is an independent provincial statutory agency governed by a Board of Directors. It is funded by insurance premiums paid by registered employers and by investment returns. In administering the *Workers Compensation Act*, WorkSafeBC remains separate and distinct from government; however, it is accountable to the public through government in its role of protecting and maintaining the overall well-being of the workers' compensation system.

WorkSafeBC was born out of a compromise between BC's workers and employers in 1917 where workers gave up the right to sue their employers or fellow workers for injuries on the job in return for a no-fault insurance program fully paid for by employers. WorkSafeBC is committed to a safe and healthy workplace, and to providing return-to-work rehabilitation and legislated compensation benefits to workers injured as a result of their employment.

WorkSafeBC Prevention Information Line

The WorkSafeBC Prevention Information Line can answer your questions about workplace health and safety, worker and employer responsibilities, and reporting a workplace accident or incident. The Prevention Information Line accepts anonymous calls.

Phone 604 276-3100 in the Lower Mainland, or call 1 888 621-7233 (621-SAFE) toll-free in British Columbia.

To report after-hours and weekend accidents and emergencies, call 604 273-7711 in the Lower Mainland, or call 1 866 922-4357 (WCB-HELP) toll-free in British Columbia.

WorkSafeBC Publications

Many publications are available on the WorkSafeBC web site. The Occupational Health and Safety Regulation and associated policies and guidelines, as well as excerpts and summaries of the *Workers Compensation Act*, are also available on the web site: WorkSafeBC.com

Some publications are also available for purchase in print:

Phone: 604 232-9704

Toll-free phone: 1 866 319-9704

Fax: 604 232-9703

Toll-free fax: 1 888 232-9714

Online ordering: WorkSafeBC.com and click on Publications; follow the links for ordering

Contents

Introduction	1
Who should read this manual?.....	1
Using this manual	2
The relationship between safeguarding and lockout	2
“Guarding” and “safeguarding”	3
Application of the OHSR and relevant standards.....	4
Web-based resources	4
1 Hazard Recognition	7
Machinery and equipment hazards.....	7
Mechanical hazards	7
Recognizing mechanical hazards.....	7
Principal mechanical components of machinery	7
Health hazards.....	10
Other hazards	11
2 Risk Assessment	15
What is risk?	15
Assessing risk	15
Hierarchy of safeguarding controls	18
3 Design and Selection Criteria for Safeguards.....	21
What is a safeguard?	21
Classification of safeguards	21
Barrier guards	21
Safeguarding devices.....	22
Safeguarded by location	23
Warning devices	23
Training, supervision, and procedures.....	23
Personal protective equipment	23
Barrier guards.....	24
Typical barrier guards.....	24
Design and performance requirements for barrier guards	25
Power transmission guards and enclosures: maximum permissible openings	26
Point-of-operation (feed) guards: maximum permissible openings.....	27
Perimeter fences and rail enclosures: reach distances to moving parts	28
Safeguarding devices.....	30
Typical safeguarding devices.....	30
Design and performance requirements for two-hand controls and trips	33

Design and performance requirements for presence-sensing devices	35
How they work	35
Photoelectric light curtains	36
Pressure-sensitive safety mats	36
Design and performance requirements for safety interlocks	37
How they work	37
Movable gate	38
Miscellaneous emergency body contact devices	40
How they work	40
Grab wire and pull wire devices	41
Shields and awareness barriers	41
How they work	41
Safeguarding by location	42
Safeguarding equipment with infrequent access.....	43
E-stops.....	43
How they work	43
Guide to selecting the right safeguard	44
4 Some Common Safeguarding Applications.....	51
Power transmission guards	51
V-belt/chain-sprocket guard	51
PTO drive shaft guard	52
Rotating shaft and coupling guard	52
Conveyors	53
Belt conveyors	53
Screw (auger) conveyors.....	54
Safe work practices for conveyors.....	55
Feed rolls	56
Safeguarding feed rolls in general.....	56
Safeguarding design criteria for feed rolls fed by hand.....	56
Metal-forming equipment.....	58
Punch presses	58
Types of punch presses	58
Methods of safeguarding	59
Brake presses	60
Types of brake presses	60
Methods of safeguarding	61
Exception to safeguarding.....	62

Power shears (sheet metal and plate).....	62
Methods of safeguarding	63
Guard design criteria for shears with capacities up to 12 mm (inch).....	64
Guard design criteria for shears with capacities over 12 mm (inch)	64
Iron workers	64
Hand-fed powered metal-forming rolls	65
Other powered roll formers	65
Abrasive equipment.....	66
Proper storage and handling of abrasive wheels	66
Design criteria for abrasive wheel guards	67
Safe work procedures for bench and pedestal grinders	67
Woodworking equipment	68
Safety and health hazards	68
Safety hazards.....	69
Health hazards	69
Point-of-operation hazards.....	69
Kickbacks.....	70
Tool projectiles	70
Preventive measures	70
Engineering controls (guards).....	70
Administrative controls (safe work practice)	71
Personal protective equipment.....	71
Safeguarding commonly used woodworking machines.....	71
Table saw	71
Radial arm saw	73
Band saw	75
Jointer	76
Shaper.....	78
Industrial robots and robotic systems	79

Appendices 81

Appendix 1 – Machine Risk Assessment Survey	83
Appendix 2 – Safeguarding Checklist.....	85
Appendix 3 – Standards Referred to in the Occupational Health and Safety Regulation.....	87
