Workers Compensation Board

Re. Environmental Tobacco Smoke

Please consider my comments on the proposed regulations dealing with Workers protection from E.T.S. Although I do not work in the Hospitality industry, I believe it is absolutely essential that workers that do, be protected from the effects of this dangerous substance. Workers should not be exposed to E.T.S. because employers believe that they will suffer financial loss if they do not allow smoking in their place of business. The only issue that is important, is the protection of workers. All other reasons for allowing smoking in a workplace should be rejected. The vast majority of people I speak to about this issue, support your initiative.
