Subject: Smopke-free workplace

to add my voice - why don't you stop legislating everything and treat us like adults? Let us respond accordingly, if we want to smoke in a bar, restaurant or LTC facility at least give us the choice! I have worked for years in Acute Psychiatry and know it is a bad time for my patients to stop smoking when they are seriously ill, I believe they have a right to a choice and so do I.

I am a nonsmoker, (it was my choice), but I am aghast at the way smokers are being treated like 2nd class citizens. So keep your rules and regulations, last time I looked it was a free country and peer pressure works better than laws.
