Subject: Smoking Legislation

I do not think WCB should be doing this. It is up to people where they want to work and if they do not wish to be exposed to a smoking environment, they should seek work elsewhere. Lots of places have chosen to keep the ban on in their establishments and that is their right and I support their decision; others choose to allow smoking and again, I support their decision. Workers and consumers of services have the choice - and WCB has no right to interfere in that process.
