Re Enviromental Policy

The WCB. is proposing a policy wich would ban smoking in all public and certian private facilities this is ludicrous the board is stepping way outside it's jurisdiction. The WCB. was orignally set up by large corporations and gouverments to prevent and limit compensation to workers, in recent times the WCB has tried to rehabilitate workers and prevent accidents no snall task for a large self-serving bureaucracy which should have been disbanded or substantly altered a long time back, It would be I believe within the boards jurisdiction to regulate air quality in certain situtations but to tell people what they can and cannot do on private properties is rude not to mention illegal, wrong and against the constitution.

Sincerly  
I. Austin
